

VOTE

Barry Ingleton

Independent candidate - Witney

Election communication

Only boldness, positivity, a clear plan, and a realistic approach will get us through these hard times and those to come.

It's time for real change, not the old, tired changes we have been enduring for the last 100 years.

Promoted by Barry Ingleton Millers court, 73 Trefoil way, Carterton, OX18 1FP, Printed by Solopress at Stock Road, Southend-on-Sea, Essex, SS2 5QF

A voice for children and young people living with SEN needs since 2003

I am the only candidate with proven experience in delivering ground-breaking support, education, and training courses for those living with SEN support needs.

I am the only candidate who understands and sees the daily pressure on families to get the support their child needs and the painful and complex barriers that need to be overcome to do so.

Businesses growth and jobs

As a business owner, I will support local shops, town centres, markets, social enterprises, and charities to create growth within Witney and the surrounding towns and villages, which delivers greater awareness at the county, national, and international levels to build growth and jobs.

I will:

- Be an advocate for all businesses, social enterprises, and charities to maintain jobs, area growth, and sustainability.
- Work to save high streets and traditional town markets.
- Protect and promote farmers and those who seek to diversify production and seek long-term environmental sustainability.

My life has shown me that past or current circumstances do not have to dictate your future opportunities, destinations, and happiness; it has been my life's work to spread this aspirational message to those who believe otherwise.

Read my story at barryingleton.co.uk

Barry is a believer in the power of community, an avid educationalist, and a mental health advocate. He has two children who mean the world to him. He is a lover of all things handcrafted and artistic, a wannabe chef, and a fan of Liverpool football club since 1989. A reader of religious history and theology and founder of Synolos CIC, which supports some of the most disadvantaged young people in West Oxfordshire.

The challenges facing Witney and surrounding towns and villages:

- Growing population
- Access to core NHS services
- Access to Special Educational Needs support
- Declining town centres and greater business support
- River pollution levels
- Infrastructure capacity and new homes
- Rural and age-related isolation, internal and external
- Food poverty
- Care funding and provision
- Poor public transport links
- Car usage reliance
- Roads are in disrepair
- Limited youth and family services
- Limited post-Brexit growth
- Limited post-pandemic growth
- A perception of fractured dialogue between national and local politics and a desire for greater MP contact.

Real change only comes from having a positive picture of the future that we can all aim for.

What I will do:

NHS and Healthcare

Supporting local healthcare needs to make Witney and the surrounding towns and villages healthy, productive, and an example of good practice for the country. As a community, we must have access to basic health needs such as timely GP appointments, NHS dental care, and support for the elderly.

I will:

- Increase GP and NHS dental and mental health appointments and campaign government to attract more overseas dentists and doctors to meet needs.
- Campaign for the government to invest further in mental health services and establish why there is a rise in mental health illnesses among all age groups and what has changed within society to allow this.
- Campaign for the government to invest further in care funding for all ages.

Tackling food poverty

Tackle the issues and reasons for food poverty and the need for food banks.

Housing, transport, and infrastructure

Housing, transport, and infrastructure that meet the needs of a growing population. Renters and buyers must have the opportunity to live and thrive in communities that meet basic needs and services.

I will

- Support the development of infrastructure demands,
- Support house building for first-time buyers and those seeking to downsize as a way of reducing supply and demand.
- Campaign to increase the percentage of social housing in new developments.
- Campaign to enable buy-to-let properties to be bought up for more social housing to support those who cannot get on the rental or buying ladder.

Community and MP Dialogue

I will develop physical and online platforms to create the most connected community-to-MP relationship that forms partnerships and a voice for all.

I will:

- Work for a nonpartisan approach at local government levels, building political unity and stronger solutions.
- Promote a community-first voice.
- Build dedicated online and face-to-face conversational platforms to create an ongoing dialogue between all sectors of the community and MPs, strengthening the voice at Westminster.

Educational and Training

I will be the voice of all things educational, protect those with educational needs, and empower all young people to excel and reach their potential. Together, we will make Witney and the surrounding towns and villages a powerhouse of excellence. My top three development priorities

I will:

- Be the voice to improve access to SEN and SEND support.
- Increase primary and secondary school placement in line with evidenced need.
- Work with all bodies to build a new secondary school to meet evidenced growing needs.

Environment

Witney and the surrounding towns and villages to set a new narrative on climate change that moves from one of doom and gloom to one that presents an aspirational future that all can buy into.

I will:

- Hold all essential services to the highest standards, including the pollution of our waterways.
- Campaign locally to reduce the polarisation of climate change beliefs to enhance climate change progress and embrace the next potential environmental industrial revolution.

The rule of law

Campaign hard that the rule of law must be on the side of the victim when delivering justice.

I will:

- Campaign for better support for victims of domestic and sexual abuse or rape.
- Campaign to ensure the human rights of the victim trump those of the fairly tried guilty perpetrator when seeking justice.
- Campaign that rehabilitation opportunities should never undermine justice for the victim.

Be a champion of national political reform.

Campaign for the removal of the whip systems and party pressures at Westminster to allow each MP to vote on conscience, not party lines.

I will:

- Campaign for party funding reforms and state-subsidised funding to reduce the influence of lobbying, wealth donors, or other external interests.
- Campaign for reforms to MP pay rises, so increases are never more than the lowest public sector raises.

Armed forces and emergency services

Supporting the local needs of our armed forces and emergency services, showing them their importance not just with gratitude but by campaigning hard for all to be provided with the resources they need to keep us all safe.

I will:

- Support the local needs of our armed forces and emergency services.
- Campaign for long-term mental health treatment within civilian life and leave the services
- Campaign for long-term physical recovery treatment within civilian life and leave the services.
